PROFILE

IoT graduate with a foundation in hardware, networking and software integration. Technical project experience is complemented by customer-facing work and shift leadership. Looking for an IT role involving troubleshooting, helping users and supporting practical systems.

EXPERIENCE AND PROJECTS

Seoul South Station / Votect

2026

Shift leadership and operations projects

Worked in daily operations and progressed to Shift Leader. Developed concepts and prototypes for inventory, reporting, POS workflows and structured menu data.

ATENA Space

2024 - 2025

Co-founder and technical project work

Structured requirements and hardware/software interfaces for an orbital servicing concept, working with a mission-analysis engineer.

CNH Industrial, Zedelgem

2021 - 2022

Industrial IoT graduation project

Designed a condition-monitoring concept and worked on a partial pilot with sensors, IO-Link and IFM moneo. Considered network constraints, data flows and documentation.

Independent web security projects

2019 - 2023

HackerOne

Tested web applications, reproduced findings and prepared vulnerability reports using Burp Suite and Kali Linux.

EDUCATION

Graduaat in Internet of Things

VIVES Noord

Diploma awarded in 2022

Hardware and networking coursework

CVO De Avondschool, Oostende

2015 - 2018

LANGUAGES

Dutch native | English fluent

French basic
